Appendix B Initial Item Pool and Selected Candidates

This appendix presents the 192 source-item records and their archived recreational screen time (RST) adaptations. Yellow highlighting identifies the pool records linked to the 21 candidates submitted for expert review. Candidate IDs refer to the original 21-item expert-review version, before further wording revisions and item reduction.

Source measures

Code	Source recorded in workbook	Measure	Source items
S1	Altindağ & Senemoğlu, 2013	METACOGNITIVE SKILLS SCALE	30
S2	Burgler et al., 2022	Metacognition in Self-Control Scale (MISCS)	12
S3	Spada & Caselli, 2017	Metacognitions about Online Gaming Scale(MOGS)	12
S4	Casale, Caponi, Fioravanti., 2020	Metacognitions about problematic Smartphone use	24
S5	Immekus & Imbrie, 2008	State measure of metacognition– 20 item self-report questionnaire (O'Neil & Abedi, 1996)	20
S6	Schraw & Dennison, 1994	Metacognitive Awareness Inventory (MAI)	52
S7	Wells & Cartwright-Hatton, 2004	metacognitions questionnaire-30 item (MCQ-30)	30
S8	Pintrich, 1991	Motivated Strategies for Learning Questionnaire (MSLQ) - Metacognitive Self Regulation dimension	12

The source total is 192. In the workbook, State Metacognitive Inventory items 18 and 19 were merged into one truncated statement in cell I100 (also C98 in the second sheet). Both source statements are restored from Immekus and Imbrie (2008), Table 1, p. 700. Their single archived RST adaptation is shown under both source records and labelled as shared; it is not counted as two independently worded adaptations. The non-item note in K45 is excluded.
